

2017

# WORLD AIDS DAY

## #LetsEndIt

### 5 THINGS

you may not know about

# HIV TODAY

Play it sexy, play it safe!  
This holiday season, make  
sure every gift is wrapped.

Still the **BEST WAY TO PROTECT YOURSELF**  
#CondomsandChill

Almost **2000**  
young women in  
South Africa are  
infected with HIV  
**EVERY WEEK**

People are starting to use

## PrEP - an HIV

prevention pill for HIV-negative  
people. Taken daily it will  
**PREVENT HIV INFECTION,**  
just like a contraceptive pill prevents  
pregnancy. Available in pharmacies.

An HIV+ person  
**WHO TAKES**   
**DAILY MEDICATION**  
and has a suppressed viral load  
will **NOT** transmit the virus  
Check your viral load and be sure!

**THE HIV EPIDEMIC IS  
NOT UNDER CONTROL.**

**We need to stay focused  
and engage - we can still be  
the GENERATION TO END HIV!**

DESMOND TUTU  
HIV FOUNDATION

Desmond Tutu HIV Foundation is a not for profit  
organisation and research centre working to  
combat HIV and associated diseases in South Africa.

For more information on our outreach programmes  
& clinical trials, you can visit

[www.desmondtutuhivfoundation.org.za](http://www.desmondtutuhivfoundation.org.za)

**IF EVERY PERSON KNOWS MORE AND  
DOES MORE, WE CAN END THIS!**
